White Rock Wind Farm Celebrates the Start of Construction

13th May 2016, Sydney, Australia

Deputy Prime Minister the Hon. Barnaby Joyce MP, Member for New England, and the Hon. Adam Marshall MP, Member for Northern Tablelands, joined Mr Liu Bin, General Manager of CECEP and Mr Wang Haibo, President of Goldwind Group today at a Ground Breaking Ceremony to commence construction of the \$400 million White Rock Wind Farm project.

“This ceremony marks the start of construction of the largest wind farm in NSW and the first in the Northern Tablelands. This investment is proceeding based on the Australian Government’s Renewable Energy Target and consistent with the NSW Government’s Renewable Energy Action Plan.” John Titchen, Managing Director of Goldwind Australia said today.

The White Rock Wind Farm project represents a significant economic investment for the Glen Innes and Inverell area. Up to 200 people are expected to be involved during construction of the wind farm, which will be fully commissioned by the end of 2017. Once operational the project will provide 10-15 local service team jobs for up to 25 years.

The 175 MW White Rock Wind Farm will produce sufficient clean renewable energy to power approximately 75,000 homes, more than all the houses in the New England area¹.

The project is actively engaging with the communities in Glen Innes and Inverell for participation in the project through sub-contracting and the purchasing of goods and services. “Goldwind and CECEP will work closely and carefully with the local community during the construction and subsequent operation of this significant wind farm,” said John Titchen, Managing Director of Goldwind Australia

Where capacity is identified within the local communities, the project is active seeking input through sub-contracting or employment opportunities. For example, at this early stage of construction local companies are being engaged, such as the fencing contractor, and negotiations are being had with local plant hire companies.

¹ Based on 64,422 private dwellings in the New England NSW Commonwealth Electoral Division, 2011 Census.

About White Rock Wind Farm

White Rock Wind Farm (WRWF) is located in the New England/Northern Tablelands region of NSW, approximately 20 kilometres West of Glen Innes and about 500 kilometres North of Sydney. Project approval was granted by the Department of Planning and Infrastructure on 10 July 2012 for the construction and operation of up to 119 wind turbines in addition to related infrastructure. The project will be staged with 70 turbines in the first stage. Construction completion is targeted for late 2017. Once operational, the 175MW White Rock Wind Farm will generate enough renewable energy to service 75,000 homes annually.

About CECEP

China Energy Conservation and Environmental Protection Group (CECEP) is China's largest technology-based service group in the field of energy conservation, emission reduction and environmental protection. CECWPC, a subsidiary of CECEP, was founded in 2006 and listed in Shanghai Stock Exchange in 2014, specializing in development, investment, management, construction and operation & maintenance of wind power projects.

About Goldwind

Goldwind Australia is a wholly owned subsidiary of Xinjiang Goldwind Science & Technology, a leading vertically integrated global wind power company offering comprehensive wind power solutions. Xinjiang Goldwind Science & Technology is listed on the Shenzhen Stock Exchange (stock code 002202) and The Stock Exchange of Hong Kong (stock code 2208). High-quality manufacturing is the foundation for Goldwind's business along with excellent customer service and technological innovation. Bloomberg New Energy Finance recently ranked Goldwind as number one in the world for newly installed capacity in 2015. In 2015 Goldwind installed more 7.8 GW with accumulated installed capacity exceeding 32 GW.
